WATERSHED PARTNERSHIP

The Illinois River Watershed Partnership was created by and is a diverse group of men and women who directly affect the water quality of the Illinois River. This group is holding itself accountable by striving to improve the water quality of the Illinois River through personal endeavors and through the education, the encouragement, and the positive reinforcement of fellow Illinois River watershed residents.

VISION STATEMENT

The Illinois River and its tributaries will be a fully functioning ecosystem, where ecological protection, conservation and economically productive uses support diverse aquatic and riparian communities, meet all state and federal water quality standards, promote economic sustainability and provide recreational opportunities.

MISSION STATEMENT

The Illinois River Watershed Partnership's mission is to improve the integrity of the Illinois River through public education and community outreach, water quality monitoring, and the implementation of conservation and restoration practices throughout the Illinois River Watershed.

OBJECTIVES

- Increase public awareness of the Illinois River as a water resource
- Cooperate with the scientific community to identify water quality impacts, causes and sources
- Educate the public about their contribution to these sources
- Collaboratively identify environmentally viable and economically feasible practices to effectively control those sources
- Work with the membership and the general public to implement water quality improvement and watershed restoration projects that will reduce these identified sources

WATERSHED PARTNERS I
