

Watershed Management Plan 2012 **Recommended Best Management Practices (BMPs)**

Forest	Conservation of existing forests, streamside management zones, and harvest BMPs
Pasture	Vegetative filter strips, riparian buffers, stream bank fencing, alternative water source, farm ponds, use of legumes, and litter transfer and utilization
Unpaved Roads	Identification of off-right-of-way issues, road bank management, ditch outlet, road surfacing and drainage, road-stream interface management, and pipe usage
Urban	Riparian restoration, urban stormwater management, municipal wastewater treatment, and septic system repair/maintenance
